

How Tamil Nadu Financed the Dravidian Model

Finance Portfolio — Definitive Performance & Reform Report (2021–2026)

Portfolio: Finance, Environment & Climate Change (Hon'ble Minister Thiru. Thangam Thennarasu) **Review period:** May 2021 to FY 2025-26 (five-year tenure)

Prepared from: the Finance-portfolio departmental note (Treasury & Accounts, Audit, Small Savings, TNIFMC/TNIDB, Archaeology, Environment), the RBI *State Finances: A Study of Budgets*, an independent GSDP-performance column, and — for the macroeconomic chapters added in this edition — official sources verified externally (Economic Survey of Tamil Nadu 2025-26, Tamil Nadu Budget documents, NITI Aayog, PRS Legislative Research); the DMK IT Wing booklet *Thalainimirntha Tamil Nadu (2021–2026)* as a “what was delivered” companion; and the Industries Department’s 2026 investment report card.

Framing. Most achievement reports describe *what* a government delivered. This report explains *how* it was financed and administered: the fiscal self-reliance, digital state capacity, audit reform and infrastructure-finance architecture that allowed Tamil Nadu to expand welfare and attract investment at the same time. Where figures are government projections, contested, or attributable to periods outside the tenure, this is flagged — credibility before advocacy.

A. Top 10 Finance-Portfolio Achievements (One-Page Summary)

1. **₹31.19 lakh crore GSDP in 2024-25**, growing **11.19% in real terms** — the fastest among Indian states and the first double-digit growth in 14 years.
2. **Own-revenue self-reliance of 75.3%** (2025-26 BE) versus an all-states average of **58.2%** — among the highest of large states.
3. **India’s No. 1 electronics-exporting state** — a record **\$14.65 billion** in 2024-25, the first state to reach that scale.
4. **Merchandise exports nearly doubled** from \$26.15 billion (2020-21) to **\$52.07 billion** (2024-25); No. 1 in electronics, textiles and leather.

5. **Per-capita income of ₹3.62 lakh** (2024-25) — about **1.77× the national average**.
 6. **₹12.16 lakh crore in investment MoUs since 2021** (1,176 MoUs; ~36.4 lakh projected jobs; ~80% under execution) — including **₹6.64 lakh crore committed at the Global Investors Meet 2024**.
 7. **IFHRMS 2.0 ("Kaniniyam") statewide** — a single digital backbone for **9.2 lakh employees and 7.4 lakh pensioners**, integrated with RBI e-Kuber.
 8. **₹1,363 crore mobilised through TNIFMC** across a Shelter Fund, an Emerging-Sector Seed Fund and a Green Climate Fund.
 9. **Fiscal discipline restored** — fiscal deficit back to ~3% of GSDP and debt-to-GSDP at ~26%, within Finance Commission limits.
 10. **Audit modernisation (CAMS/APMS)** plus a layered **social-security package** (medical insurance + family-security fund + bank MoU) for the government workforce.
-

B. Executive Summary

Between 2021 and 2026 the Finance portfolio pursued four reinforcing goals — **fiscal self-reliance, digital administration, social security, and climate-aligned infrastructure finance** — which together underwrote a simultaneous expansion of welfare and investment.

The macroeconomic outcome was strong: Tamil Nadu retained its place as **India's second-largest state economy**, grew fastest among states in 2024-25, doubled merchandise exports, and became the country's leading electronics exporter. The fiscal outcome was a credible recovery from the pandemic shock — deficits brought back toward statutory norms while own-revenue mobilisation rose to ~75% of revenue receipts.

The institutional story beneath these numbers is the report's distinctive contribution: a treasury and HR system (**IFHRMS 2.0**) capable of disbursing salaries, pensions and scheme benefits at scale; a unified **audit** apparatus (CAMS/APMS); catalytic **fund vehicles** (TNIFMC) that supplement budget spending; and a climate and heritage agenda treated as **economic** policy rather than peripheral activity.

C. Economic Transformation (2021–2026)

This chapter responds to the most-asked question — what did the economy actually do — using externally verified official data.

C.1 Growth and Size

- **GSDP (current prices):** approximately **₹17.9 lakh crore (2020-21)** to **₹31.19 lakh crore (2024-25)**; the Budget projects **~₹36.57 lakh crore (2025-26 BE)**. *(The 2024-25 figure and growth rate are from the Economic Survey of Tamil Nadu 2025-26; the 2020-21 starting figure is per the source note and is broadly consistent with published series.)*
- **Real GSDP growth of 11.19% in 2024-25** — the **highest among Indian states** and the state's first double-digit growth in 14 years; nominal growth ~16%.
- Tamil Nadu remains **India's second-largest state economy** (after Maharashtra), contributing roughly 9% of national GDP with ~4% of land area.
- The State has set a **trillion-dollar-economy aspiration** (variously cited as 2030 or 2032-33).

C.2 Incomes and Living Standards

- **Per-capita income reached ₹3.62 lakh in 2024-25**, about **1.77× the national average** (~₹2.05 lakh), up from ₹3.13 lakh in 2023-24.
- **32 of 38 districts** recorded per-capita incomes above the all-India average.
- **Multidimensional poverty** (National MPI) fell from **4.76% (2015-16) to 2.20% (2019-21)**, with more recent estimates near ~1.4%. *Caveat: the bulk of this decline occurred in 2015-16 to 2019-21, largely predating the 2021-26 tenure; it reflects a long-run trajectory rather than a single-term outcome.*

C.3 Exports and Manufacturing — the Growth Engine

- **Merchandise exports nearly doubled** from **\$26.15 billion (2020-21) to \$52.07 billion (2024-25)**.
- Tamil Nadu **ranks first nationally in electronics, textiles and leather exports**, and second in engineering goods.
- **Electronics exports surged** from \$1.66 billion (2021-22) to a record **\$14.65 billion (2024-25)** — making Tamil Nadu **India's top electronics-exporting state**, and the first to launch a State Electronics Components Manufacturing Scheme.
- **Manufacturing grew 14.74%** and **services 11.3%** in 2024-25; the secondary sector contributes ~33% of GSDP.
- **FDI inflows rose to \$3.68 billion (2024-25)** from ~\$2.17 billion (2022-23), defying the national slowdown.

C.4 Export Readiness — a Precise Statement

Tamil Nadu was ranked **No. 1 in NITI Aayog’s Export Preparedness Index (EPI) 2022**. In the most recent **EPI 2024 (released January 2026)**, **Maharashtra overtook it and Tamil Nadu ranked second** among large states (with Gujarat third). The State therefore remains a consistent top-tier exporter, while no longer holding the No. 1 EPI slot — an honest framing that strengthens, rather than weakens, the report’s credibility.

Context (independent view): An analytical column (Mudar Patherya) estimated Tamil Nadu’s nominal-dollar GSDP rising from ~\$241 billion (2020-21) to ~\$369 billion (2024-25) — about **\$128 billion** of wealth creation, ~\$32 billion a year — characterised as outperformance. The author cautions these are indicative nominal-dollar figures influenced by inherited momentum and external factors; treat as directional.

D. Macro-Fiscal Self-Reliance & Comparative Benchmark

D.1 Own-Revenue Share (RBI State Finances — Table A.2)

Year	Tamil Nadu	Karnataka	Maharashtra	All States
2020-21	66.97	66.97	66.88	52.10
2022-23	68.63	68.80	72.54	55.93
2023-24	73.01	75.69	75.06	57.82
2024-25 (RE)	75.15	75.59	57.94	56.88
2025-26 (BE)	75.31	76.79	74.98	58.17

Benchmark takeaway: Tamil Nadu funds about **three-quarters** of its revenue from its own sources, roughly **17 percentage points above the all-states average**. High self-reliance means greater budget flexibility, more sustainable welfare, and reduced exposure to the timing and adequacy of central transfers.

D.2 Why This Matters

Self-reliance is the fiscal precondition for the “Dravidian Model”: large recurring welfare commitments (free bus travel, women’s income support, breakfast scheme) are only sustainable if the State controls a dependable, growing own-revenue base. The treasury, GST and e-receipt reforms (Chapters F and J) are precisely what protect that base.

E. Creditworthiness & Fiscal Discipline

Indian states do not carry standalone international credit ratings (they borrow within the sovereign framework via market State Development Loans). "Creditworthiness" here therefore means deficit trajectory, debt sustainability within statutory limits, and reliable market access.

Indicator	Position
Fiscal deficit (% GSDP)	~4.99% (2020-21 RE, COVID) → 3.0% target (2025-26 BE) ; ~3.48% in RE 2025-26
Revenue deficit (% GSDP)	3.28% (2020-21) → ~1.2% (2022-23) → ~1.6% (2024-25)
Debt-to-GSDP	~26.07% (2025-26 BE) — within Finance Commission limits
Outstanding debt	₹9.29 lakh crore (BE 2025-26) → ₹9.52 lakh crore (RE)
Gross market borrowing	~₹1.62 lakh crore (2025-26)

Reading for policy makers:

- The deficit recovery from the pandemic peak back toward the 3% statutory norm signals **fiscal credibility** to lenders and the Finance Commission.
- **Debt has risen in absolute terms** (a fair-minded report must say so), but the **debt-to-GSDP ratio has stayed within limits**, because GSDP growth has kept pace — sustainability is about the ratio, not the rupee figure.
- Continued reliable access to SDL markets at competitive spreads is the practical proxy for a good "rating."

F. GST & Revenue Mobilisation — the Engine of the 75% Ratio

The high own-revenue ratio (Chapter D) is the *outcome*; this chapter is the *cause*.

- **State Own Tax Revenue** is anchored by **State GST and Commercial Taxes**, supported by stamps & registration, state excise, vehicle tax and electricity duties.
- **Modernisation levers documented in the departmental note:** e-Challan/e-Receipt 24x7 online payment of dues; **RBI NEFT/RTGS** for instant receipt credit (since April

2023); integration of Commercial Taxes and Prohibition & Excise into the receipts platform; four aggregator banks sweeping revenue into the State's RBI account.

- **Why it is remarkable:** sustaining a ~75% own-revenue share *while* expanding welfare requires both buoyant tax collections and leak-proof, real-time receipt systems. The digital receipt architecture is what converts economic growth (Chapter C) into usable fiscal space.

Data gap to close before external use: the departmental note describes integration but not collection **outcomes**. A short annexure with SOTR and SGST collection growth (2020-21 to 2025-26) would make this chapter authoritative.

G. Finance as the Enabler of Welfare

This is the connective tissue the original note left implicit. **Higher own-revenue + digital treasury systems = the ability to deliver welfare at scale.**

Flagship scheme	Enabled by
Kalaiginar Magalir Urimai Thogai (women's income support)	Direct-benefit transfer rails via IFHRMS 2.0 / RBI e-Kuber
Pudhumai Penn & Tamil Pudhalvan (education incentives)	Beneficiary masters and large-batch disbursal in IFHRMS
CM Breakfast Scheme	Reliable recurring fund release through treasury operations
Makkalai Thedi Maruthuvam	Fiscal space created by own-revenue self-reliance
Free bus travel (Vidiyal Payanam)	Budgetable, audited subsidy flows; transport viability fund

Through these rails the State already administers **14 lakh Old-Age Pension** and **8 lakh Muthulakshmi** beneficiaries, alongside salaries for **9.2 lakh employees** and **7.4 lakh pensioners** — demonstrating that welfare scale-up did not collapse under administrative complexity because the *systems were built first*.

H. The State-Capacity Revolution (Digital Governance)

The single most consequential governance achievement is the shift from fragmented, paper-based processes to a unified digital financial state.

Before (pre-reform)	After (2021–2026)
Manual, paper treasury files	IFHRMS 2.0 ("Kaniniyam") end-to-end
Cash/cheque revenue handling	e-Challan / e-Receipt (24x7 online)
Delayed receipt credit	RBI NEFT/RTGS instant credit
Manual, lagging audit	CAMS (audit) + APMS (objection tracking)
Siloed scheme monitoring	TNPFMS (99 schemes, 40 departments)
In-person service	Kaniniyam mobile app (leave, advances, pension, life-certificate)

Net effect: salary, pension, scheme transfers, revenue receipts and treasury operations now run on one integrated, RBI-linked backbone. Politically invisible; administratively transformative — this is the infrastructure that makes both welfare delivery and revenue capture dependable.

(Full operational detail of each system is in Chapters J–K.)

I. Climate Finance Leadership

Tamil Nadu is among the few Indian states attempting **climate governance, climate finance and green industrialisation as a single coordinated strategy** — which is why this deserves flagship status rather than a regulatory footnote.

- **TN Green Climate Fund (TNGCF):** SEBI-registered (03.08.2023); first phase **₹110 crore** across three investments; target **2.5 million MT carbon reduction**, aligned to the State's **net-zero-by-2070** pathway.
- **TN Emerging Sector Seed Fund (TNESSF):** 13 startups, **₹30.1 crore** committed; targeted impact includes 1,500+ EVs, carbon/material-use reduction and ~60,000 jobs.
- **District Climate Change Missions** in every district (Collector as Project Director, DFO as Climate Officer); **Green Local Bodies** (297 selected); **Green Fellows** running 1,284+ awareness campaigns reaching ~36 lakh people.

- **Meendum Manjappai:** 15 lakh+ cloth bags, 200+ dispensing machines, 2.99 lakh awareness events, films broadcast to 60,000 schools.
- **Pollution control with measurable results (TNPCB):** NCAP-period PM10 reductions of **Thoothukudi –45%, Trichy –18%, Madurai –18%, Chennai –12%** (2021–2025); 55 continuous air-quality and 8 real-time water-quality stations; NABL-accredited labs.

Why this is unusual: climate is treated as an **economic portfolio** — fund vehicles, industrial incentives and infrastructure pipelines — not merely compliance. It is administratively co-located with Finance, reinforcing the link to long-term infrastructure financing.

J. Treasury & Accounts Department (Operational Detail)

J.1 Mandate and Scale

Reorganised as a separate department in **1962** under Finance; operates 6 zonal Joint-Director offices, 6 Pay & Accounts Offices, 3 Sub-Pay & Accounts Offices, 38 District Treasuries, 1 Pension Pay Office and 243 Sub-Treasuries. It salaries **9.2 lakh+ employees**, pays **7.4 lakh+ pensioners**, releases scheme funds, sends monthly accounts to the AG, and administers stamps and medical insurance.

J.2 IFHRMS 2.0 — Features

Statewide (piloted in Karur, Jan 2020); salaries/bills via **RBI e-Kuber; e-Challan/e-Receipt** (24×7), four aggregator banks; **NEFT/RTGS** since 24.04.2023; **Kaniniyam app** (27.02.2024). Modules: **OPPAS** (e-pension/gratuity/GPF settlement), **DAAS** (paperless e-Vouchers; AG exemption from 01.02.2025), automatic income-tax computation, CPS final settlement, NPS-to-NSDL, and **duplicate-beneficiary detection** (CMUPT, OAP, SSN-IG). Ongoing integration: Transport, Registration, TANGEDCO (phased from 01.01.2025), BSNL, and a **Global Beneficiary Master** with large-batch (up to 10 lakh) disbursal.

J.3 Workforce Social Security

- **Pensioners' Family Security Fund:** ₹50,000 lump-sum on death; **₹121 crore** advanced to clear a COVID-era backlog — **25,000 claims/families** settled. *(A source sidebar cites ₹125 crore — see Caveats.)*
- **Employees' Medical Insurance (2021):** ₹5 lakh cover (special-disease ceiling up to ₹20 lakh), ₹300/month, 203 procedures, 1,497 hospitals + 16 radiation centres; extended to **30.06.2026. Outcome: 3,33,675 beneficiaries, ₹1,706.19 crore.**

- **Pensioners' Medical Insurance (2022, to 30.10.2025):** 1,490 hospitals. **Outcome:** 3,37,338 beneficiaries, ₹1,447.91 crore.
- **State Government Employee Account (bank MoU, 19.05.2025):** 7 banks; ₹1 crore accident cover; up to ₹10 lakh education / ₹5–10 lakh marriage for deceased employees' children; ₹10 lakh life cover for natural death. **₹20.65 crore paid to 46 families** to date.

J.4 Pension Simplification, Buildings, Codification

- Year-round pensioner interview (since 01.07.2023); automatic service-to-family-pension conversion.
- New District/Sub-Treasury buildings inaugurated (25.10.2021, 26.08.2022); integrated complex named **Professor K. Anbazhagan Maaligai** (19.12.2021).
- **TN Treasury Code and Financial Code Vols. I & II** rewrite with **ICAI-ARF** (sanction ₹57.82 lakh).
- **TNPFMS:** end-to-end revenue/expenditure monitoring — **99 schemes across 40 departments.**

K. Audit Reforms

- **Unified Chief Auditor** office created to bring Local Fund, Co-operative, Milk Co-operative, State Government and HR&CE audit under Finance.
- **CAMS** live **15.04.2025** (audit lifecycle digitised; Q1–Q2 of 2025–26 completed on it); **APMS** live **17.11.2025** (objection tracking); IDEA analytics; **100% e-Office** in State Government Audit.
- **Objections cleared:** 81,354 non-monetary + 2,049 monetary paras (₹2,883.22 lakh); **audit fees of ₹528.41 crore** collected over four years.
- **Recruitment:** 918 Junior Co-operative Auditors + 8 Assistant Directors (2024).
- **Milk co-operatives:** a record **53,280 primary societies** audited; **performance audit** introduced (2023) for charitable institutions; **Template Audit** for ~18,000 small bodies.

L. Infrastructure Financing & the Investment Linkage

L.1 TNIFMC — Catalytic Funds (≈₹1,363 crore mobilised)

--	--	--	--

Fund	Mobilised	Approved more	Focus
Shelter Fund (TNSF)	₹658 cr	—	Affordable housing; working-women & elderly hostels
Emerging Sector Seed Fund (TNESSF)	₹105 cr	₹200 cr	Deep-tech, biotech, agri-tech, med-devices
Green Climate Fund (TNGCF)	₹100 cr	₹300 cr	Decarbonisation, e-mobility, climate infra

- **Thozhi working-women's hostels (TNSF):** 17 hostels / 1,800 beds (Phase 1, 2023); 27 locations / 2,600 beds upcoming.

L.2 TNIDB, Investment Attraction and the GIM Linkage

The strongest political-economy argument is that **Finance and Industry worked together** — fiscal stability underwriting investor confidence.

- **Cumulative tenure performance (2021–2026):** Tamil Nadu signed **1,176+ investment MoUs worth ₹12.16 lakh crore** (~\$136 billion), with an employment potential of **~36.4 lakh jobs** (direct + indirect); the Industries Department reports **~80% of MoUs under execution** (a later "Conversion Conclave 2026" update cited ₹12.37 lakh crore / 1,179 MoUs / 36.52 lakh jobs and a 73.5% conversion rate). *These are committed/under-execution figures, not fully realised investment — the execution and conversion rates are the metrics to track.*
- **Global Investors Meet 2024 (7–8 January 2024):** **₹6.64 lakh crore** committed, expected to create **26.9 lakh jobs** (14.55 lakh direct + 12.36 lakh indirect) — the single largest mobilisation event within the cumulative total above.
- **TNIDB** runs a large PPP/HAM/DBFOT pipeline — water (desalination, smart meters), energy (battery storage, pumped hydro, rooftop solar), mobility (electric buses, ECR elevated corridor) and industrial parks.
- The State frames itself as **"India's manufacturing capital"**, targeting a **\$1 trillion economy by 2030**.

L.3 Externally Aided Projects

Chennai City Partnership: Sustainable Urban Services Program — **US\$701 million** total, with **World Bank and AIIB contributing US\$150 million each**; 19 disbursement-linked indicators; TNIDB as monitoring agency.

M. Heritage as Economic Policy

A distinctively Tamil Nadu feature — archaeology framed as tourism, identity and local livelihood, not merely culture.

- **₹16.93 crore** conservation (Thanjavur, Danish Fort/Tharangambadi, Madurai Thirumalai Nayakkar Palace); **2025-26 allocation ₹25 crore**.
 - **Keeladi** world-class museum (₹3.8 crore, 34 posts); **Porunai Museum, Tirunelveli (₹58.69 crore)**.
 - **Scientific milestones:** Mayiladumparai iron artefacts dated to ~4,200 years (c. 2172 BCE), advancing India's Iron-Age chronology; Gangaikonda Cholapuram excavations revealing Chola maritime trade.
 - **20,000+ inscriptions** documented; four new district museums (Tirunelveli, Ramanathapuram, Tenkasi, Kanyakumari); MoUs with foreign universities; student stipend raised ₹4,000 → ₹5,000.
 - **Economic logic:** sites like Keeladi generate local employment and domestic/foreign tourist footfall, converting heritage into regional economic activity.
-

N. Synthesis — How Tamil Nadu Financed the Dravidian Model

If the welfare schemes are the *visible* output, this report documents the *institutional architecture* beneath them. Six pillars operated simultaneously:

1. **Fiscal self-reliance** (~75% own revenue) created sustainable budget space.
2. **Digital state capacity** (IFHRMS 2.0, e-Challan, CAMS/APMS, TNPfMS) made delivery and revenue capture dependable.
3. **Welfare at scale** rode on those rails (9.2 lakh employees, 7.4 lakh pensioners, 14 lakh + 8 lakh scheme beneficiaries).
4. **Infrastructure finance** (TNIFMC funds + PPP pipeline + GIM 2024) supplemented budget spending with instruments and private capital.
5. **Climate-aligned planning** tied green funds and industrialisation to a 2070 net-zero pathway.
6. **Economic transformation** followed — fastest-growing state, No. 1 electronics exporter, doubled merchandise exports, rising per-capita income.

The complete statement: *Tamil Nadu's 2021–2026 model combined large-scale welfare*

expansion with fiscal self-reliance, digital governance, audit and treasury reform, infrastructure finance, climate planning, and export-oriented industrial growth — a more complete explanation of the “Dravidian Model” than any single scheme or statistic conveys. It is, in effect, a case study in state capacity and economic governance.

O. Observations & Recommendations for Policy Makers

1. **Publish the revenue outcomes.** Add an annexure with SGST/SOTR and commercial-tax collection growth (2020-21→2025-26) to make the 75% own-revenue claim self-evidently authoritative (Chapter F gap).
 2. **Lock in self-reliance structurally**, not cyclically — complete Transport/Registration/TANGEDCO/GST data integration and publish a quarterly receipts dashboard.
 3. **Manage the debt narrative proactively.** State that absolute debt has risen but the debt-to-GSDP ratio remains within limits; pair this with the deficit-reduction path to pre-empt criticism.
 4. **Pre-fund social-security schemes.** The Family Security Fund needed a ₹121 crore bailout; an actuarial corpus rule would prevent recurrence (apply equally to the medical-insurance corpus).
 5. **Report realised PPP/GIM investment**, not just commitments — convert the ₹6.64 lakh crore GIM headline into a tracked “committed vs. grounded vs. operational” scoreboard.
 6. **Scale the climate funds.** TNGCF/TNESSF are early-stage relative to the Shelter Fund; clear deal pipelines and measured carbon outcomes would build them toward the 2070 target.
 7. **Track CAMS/APMS outcomes** (closure rates, recoveries, time-to-resolution) so digitisation translates into demonstrable accountability.
 8. **Be precise on rankings** (e.g., EPI No. 1 in 2022, No. 2 in 2024) — accuracy protects the report’s authority with legislators and rating-sensitive audiences.
-

P. Data Caveats & Methodological Notes

- **Out-of-order source.** The departmental note was a jumbled extraction; it has been re-sequenced and de-duplicated by department.
- **Verified externally** (this edition): GSDP, growth rate, per-capita income, exports,

electronics-export rank, FDI, GIM 2024, fiscal/debt ratios and own-revenue share were checked against the Economic Survey of Tamil Nadu 2025-26, Tamil Nadu Budget documents, RBI, NITI Aayog and PRS Legislative Research.

- **Attribution discipline:**
 - **Poverty decline (4.76%→2.20%)** occurred mainly in 2015-16 to 2019-21, largely *before* the tenure — do not over-attribute.
 - **Export Preparedness Index:** No. 1 in **2022**; **No. 2 (behind Maharashtra) in EPI 2024**, released January 2026.
 - **Patherya GSDP-wealth figures** are an independent nominal-dollar estimate with the author's own caveats — directional only.
 - **Investment figures (₹12.16 lakh crore; GIM 2024 ₹6.64 lakh crore)** are *committed MoU* values, externally corroborated via the Industries Department; they are not fully realised investment — track execution (~80%) and conversion (~73.5%) rates.
 - **No standalone credit rating** exists for Indian states; "creditworthiness" is expressed via deficits, debt-to-GSDP and market-borrowing access.
- **Source inconsistencies in the departmental note:** Family Security Fund advance cited as ₹125 crore (sidebar) vs ₹121 crore (body); several treasury-building costs appear mis-transcribed (likely crore, not lakh) and dubious values were omitted; medical-insurance cover read as ₹5/10/20 lakh; the TNIDB "2030 economy target" figure was corrupted in the extraction and is described qualitatively; hospital counts differ slightly (1,497 vs 1,490) between the employee and pensioner sections.
- **Currency:** figures are in Indian rupees (crore/lakh) unless a US-dollar figure is explicitly stated. Verify all headline numbers against original budget documents before external citation.

Compiled for policy review. This edition expands the departmental note into an economic-governance case study; macroeconomic claims are externally verified and contested or out-of-period figures are flagged in Section P.
